

Role Guide

What each role can do in the app, how to do it, and how it shows up for everyone else.

For Everyone who uses the app — head office, kitchen managers and kitchen staff

Version 19 September 2026

Kitchens 8 — Surat: Surat Prep Kitchen, Capiche Piplod, Capiche Vesu, Aiko Pal · Ahmedabad: Ahmedabad Prep Kitchen, Capiche Ambli, Capiche Uni, Aiko Ambli

Contents

1. The 8 roles at a glance
2. What everyone can do — signing in, passwords, sign-up, offline
3. Role by role — Super Admin, Execution Heads, Admin, Head of Kitchen, Location Manager, Kitchen Staff, Auditor
4. How work moves between accounts — cleaning jobs, products, timing
5. Admin use cases — step-by-step for common situations
6. The cleaning schedule
7. Appendix — permission table and glossary

"Profile" in this guide means the round button with your initials at the top right of every screen. Paths are written like

Profile →  Change my password .

1. The 8 roles at a glance

Every account has exactly one role. The role decides which kitchens you see and which buttons you get. Head-office roles see all 8 kitchens; a Location Manager and Kitchen Staff see only their own kitchen.

Role	Who it is for	Kitchens	Main powers
Super Admin	The one owner of the system (Husen)	All 8	Everything an Execution Head can do, plus: approve or reject new sign-ups, answer "forgot password" requests, the User Management panel. There is only ever one.
Execution Head	Senior head office	All 8	Approve / reject cleaning, all reports, create and remove users, change roles, reset passwords.
Assistant Execution Head	Head office	All 8	Same as Execution Head.
Admin	Head-office administration	All 8	Same as Execution Head.
Head of Kitchen	Culinary lead across kitchens	All 8	Approve / reject cleaning, record cleaning and products anywhere, all reports. Cannot manage people.
Location Manager	The manager of one kitchen	Own only	Do and approve cleaning, products and labels for their kitchen; their kitchen's reports.
Kitchen Staff	Everyone working in a kitchen	Own only	Do cleaning jobs with a photo, add and label products, check expiry. Simple home screen, no Reports.
Auditor	Inspectors, auditors	All 8	Read-only: sees everything, reports and photos, but cannot change anything.

The Super Admin

The Super Admin is the single account that decides who gets into the system. It cannot be given from inside the app — no form offers it — and it is set only by IT on the server. If it is moved to someone else, the previous Super Admin automatically becomes an Execution Head. Nobody else can reset, edit or remove the Super Admin account.

How the kitchen score works

Each kitchen gets a score out of 100 every week: **40% cleaning** (jobs done *and approved*), **35% expiry control**, **25% labelling**. A cleaning job only counts once a manager or head office has approved it.

2. What everyone can do

Sign in

1. Open the app and type your **User ID** (usually your first name in lower case, e.g. *rahul*) and password.
2. Tap **Sign in**. You stay signed in on that phone until you log out.

Signing in needs an internet connection. A wrong ID and a wrong password give the same message, on purpose.

First sign-in — choose your own password

New accounts start with the password **1234**. The first time you sign in, the app stops at **Choose your password** and you cannot continue until you set your own.

- At least **8 characters**, and it cannot be 1234.
- Keep it to yourself — everything you do is recorded under your name.

Change your password

1. [Profile → !\[\]\(e492b5d52ab457a7a3c2826c4091dfee_img.jpg\) Change my password](#)
2. Type your **current** password, then the new one twice, and tap **Save new password**.

Effect: every other phone where you were signed in is signed out. The phone you used stays signed in.

Forgot your password

1. On the sign-in screen tap **Forgot password?**, type your User ID, tap **Ask for a new password**.
2. The request goes to the **Super Admin**, who sets a temporary password and tells you what it is.
3. Sign in with the temporary password; the app then makes you choose your own.

The screen says the same thing whether or not the ID exists, so it cannot be used to find out who has an account.

Create your own account (new starters)

1. On the sign-in screen tap **New here? Create your own account**.
2. Enter your name, choose a username and password, and pick your kitchen.
3. Your account is **waiting for approval**. You cannot sign in until the Super Admin approves it and sets your role and kitchen. (Trying earlier shows "waiting for approval".)

Too many wrong passwords

After 8 wrong passwords in a row the account is locked for **15 minutes**. The message says how long. To get in sooner, ask Husen, Manish or Rutvik to reset your password — a reset also unlocks the account.

Working offline

Once signed in, the app keeps working without internet. Cleaning jobs, photos and products are saved on the phone and upload automatically when the connection returns. A grey bar says "No internet — your work is being saved".

Notifications (the bell)

Everyone has the bell. It lists, for the kitchens you can see: overdue cleaning, missing photos, rejected jobs, jobs awaiting approval, expired and soon-to-expire products, and missing labels. "Mark all as read" only affects your own phone.

Log out

[Profile → Log out](#). This also ends the session on the server, so the phone cannot be used to get back in without the password.

3. Role by role

Each role below lists what you see, what you can do and how, and what you cannot do. Head-office roles share a lot, so later sections refer back to earlier ones.

Super Admin

All 8 kitchens

One account only

You see: the full dashboard; a **User Management** button in the menu with a red number when something needs you; Home cards for new sign-ups and password requests.

Everything an Execution Head can do (next section), plus these, which only you can do:

Task	How
Approve a new sign-up	Profile →  People, roles & passwords → "Waiting for approval" → choose their role and kitchen → ✓. They can sign in straight away.
Reject a sign-up	Same list → ✕. The account is deleted.
Answer a "forgot password" request	User Management → "Password reset requests" →  Set new password → type a temporary one (or leave blank for 1234). The username and password are shown once — give them to the person.
Dismiss a request	Same row → ✕ (when no reset is needed). Their password is unchanged.
See every account	User Management → "All accounts": name, username, role, kitchen, last sign-in, and whether their password is still temporary.
Set a password for anyone	User Management → their row →  Set new password .
Remove someone who has left	User Management → their row → ✕ Remove → confirm "Yes, remove" → OK.

Passwords are never visible — not even to the Super Admin. They are stored scrambled (one-way). To get someone back in, you set a new temporary password; they must change it at their next sign-in.

You cannot: remove yourself, or change your own role from the app. Moving the Super Admin role is done by IT on the server.

Execution Head · Assistant Execution Head · Admin

All 8 kitchens

These three roles have the same abilities.

Dashboard and reports

- **Home:** overall score, kitchen league table, Surat vs Ahmedabad, the "every Tuesday" card, key numbers (expired, pending, rejected, missing photos, urgent alerts). Tap a kitchen for its detail.
- The kitchen picker at the top includes **All 8 locations** on Home and Reports.
- **Reports tab:** kitchen-by-kitchen scores, violations, staff compliance and photo evidence.  **Print / PDF** or  **Export CSV** (opens in Excel).

Cleaning, products, labels

- Approve or reject any kitchen's cleaning jobs — see *Location Manager* for the steps. Home shows ☒ **Approvals (n)**.
- Can also do cleaning jobs and add products at any kitchen.

People

Task	How
Create a user	Profile →  People, roles & passwords → + Create a new user → name (Login ID fills in), role, kitchen → Create. The ID and starting password are shown once.
Change someone's role	People → the role dropdown on their row. Takes effect on their phone within about 15 minutes, or when they reopen the app.
Reset a forgotten password	People →  on their row. Their password goes back to 1234 and they must choose a new one; they are signed out everywhere.
Remove someone who has left	People → ✕ on their row → confirm.
Other	Profile →  Cloud sync (status, Sync now),  Cleaning checklist (view the full list of jobs),  Recent activity .

You cannot: approve or reject sign-ups (you see the names, marked "Only the Super Admin can approve"); see the "forgot password" queue; change, reset or remove the Super Admin; demote or remove yourself; remove or demote the last account that can manage people.

Recent activity shows actions taken **on your own phone** only. It is not a shared log of what staff did on theirs — for that, use Reports.

Head of Kitchen All 8 kitchens

- Same dashboard, alerts and Reports as head office, across all kitchens.
- **Approve / reject** cleaning jobs anywhere; do cleaning jobs; add, edit and label products anywhere.
- **Cannot** manage people: no People screen, no User Management, cannot reset passwords.

Location Manager Own kitchen only

You see: your kitchen's dashboard, a "Needs action this week" list, the bell, and Reports for your kitchen. New weekly and monthly jobs are assigned to you by default.

Task	How
Approve a finished job	Cleaning → chip To approve (or Home → ☒ Approvals) → open the job → check the photo → Approve . It now counts towards the score.
Reject a job	Same screen → Reject → type the reason (e.g. "grease still on the hood") → it goes back to the kitchen with the reason in red.
Do a cleaning job yourself	As for Kitchen Staff (below). You can also approve it.
Products, labels, expiry	As for Kitchen Staff, for your kitchen.
Reports	Reports → your kitchen → Print / PDF or Export CSV.

You cannot: see other kitchens, manage people, or reset passwords (ask head office).

Kitchen Staff Own kitchen only

You see: a simple home with four big buttons — **Cleaning**, **Label a product**, **Check expiry**, **Scan a label** — plus this week's jobs and a "Throw these away" list. Four tabs: Home, Cleaning, Expiry, Labels (no Reports).

Task	How
Do a cleaning job	Cleaning → tap a job → clean the area → tap the photo box and take a photo → ✓ Done — send for approval . The green button only appears after a photo.
A job came back rejected	It shows REJECTED with the manager's reason. Fix it, take a new photo, tap Done again.
Add and label a product	Home → Label a product (or Expiry → + Add product) → photo → name, batch, dates, storage → Save → the label opens → Print this label → stick it on → ✓ I have written it and stuck it on .
Check expiry	Expiry . Red = throw away today; orange = use within 7 days; yellow = within 30 days. Check at the start of every shift.
Scan a label	Home → Scan a label → point the camera at the QR code → the product opens.

- You can record **any** job in your kitchen, not only ones assigned to you. The chip **My jobs** shows jobs assigned to you.
- Each job needs **one** photo. It is stamped with the date, time and your initials.
- You **cannot** approve jobs ("Waiting for manager approval"), see other kitchens or open Reports.

Auditor

All 8 kitchens

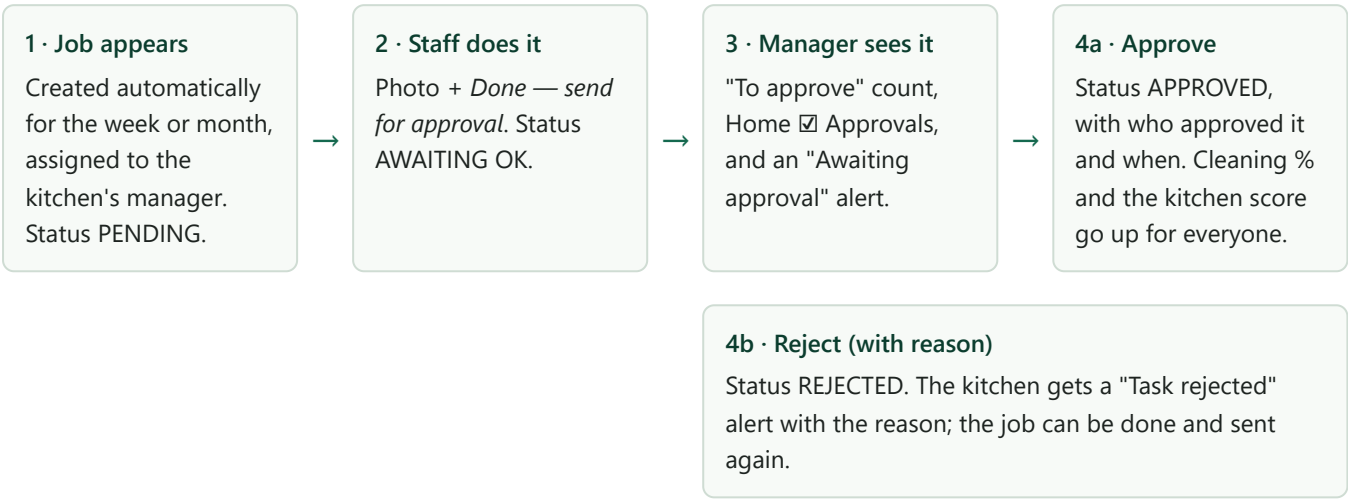

Read-only

- Sees the full dashboard, the bell, every kitchen's cleaning jobs, products and photos, and all Reports (including Print / PDF and CSV).
- Home shows  **Open reports** instead of "Do a clean / Add product".
- **Cannot change anything:** no photo taking, no Done, no Approve / Reject, no adding or editing products. The server refuses changes from an Auditor account even if attempted.

4. How work moves between accounts

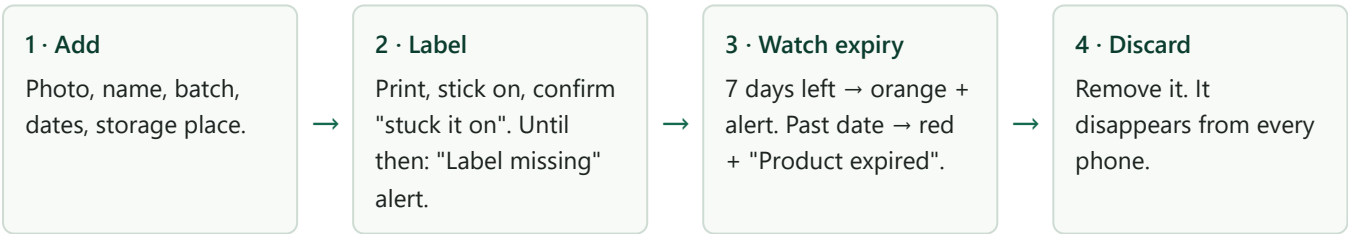

All phones share one copy of the data through the Bookends server. What one person does appears on everyone else's phone who can see that kitchen.

A cleaning job, from start to score

- If the due date passes while a job is still pending, it shows **OVERDUE** and raises an alert.
- **Re-open** (↺) puts a finished job back to pending — use it if something was marked done by mistake. Only roles that can approve can re-open, and once a job is approved kitchen staff can no longer change it or its photo.

A product, from delivery to bin

Accounts

When this happens...	...this is the effect on the other person
An admin creates an account	They can sign in with the ID and 1234, and must choose a password first.
Someone signs up themselves	The Super Admin's menu badge and Home card count go up within a minute. They cannot sign in until approved.
Someone taps "Forgot password"	Appears on the Super Admin's User Management panel, Home card and badge.
A password is reset (by anyone)	The person is signed out on every phone and must choose a new password. Any "forgot password" request for them is cleared.

When this happens...	...this is the effect on the other person
A role is changed	Applies on their phone within about 15 minutes, or immediately if they close and reopen the app.
An account is removed	They cannot sign in again. Work they already recorded is kept.

How fast things appear

Change	When other phones see it
Cleaning job done, approved, rejected; product added or changed	Uploaded within about a second; other phones pick it up within about 45 seconds , or as soon as the app is opened or brought back to the front.
Anything done offline	Uploads automatically when the phone is back online, even if the app was closed in between.
Photos	Uploaded to the Bookends server; a photo taken offline uploads once the connection returns.
New sign-ups / password requests (Super Admin)	Checked every minute while the app is open.
Role change, removal	Within about 15 minutes, or on reopening the app.

5. Admin use cases

Step-by-step for the situations head office handles most. "Admin" here means Super Admin, Execution Head, Assistant Execution Head or Admin unless a step says otherwise.

A. A new staff member joins

1. Profile →  People, roles & passwords → + Create a new user
2. Type their name — the Login ID fills in (change it if you like: lower-case letters and numbers).
3. Role: **Kitchen Staff**; kitchen: theirs. Leave the password blank for 1234. Tap **Create user**.
4. Give them the Login ID and password shown on screen. On first sign-in they choose their own.

B. Someone created their own account (Super Admin)

1. The menu badge / Home card shows "new account waiting for approval". Tap it.
2. Check the name and the kitchen they said they work at.
3. Pick their real **role** and **kitchen**, tap ✓. Or ✕ if you don't know them — the account is deleted.

C. Someone forgot their password

1. **Super Admin**: Home card "password reset request" →  **Set new password** → type a temporary password → give them the username and password shown (shown once only).
2. **Other admins**: People →  on their row → password becomes 1234.
3. They sign in and must choose a new password straight away.

D. Someone is locked out ("Too many failed attempts")

Either wait 15 minutes, or reset their password as in C — a reset unlocks the account immediately.

E. Promote someone or change their role

1. People → change the role dropdown on their row. Choosing a head-office role gives them all 8 kitchens.
2. Ask them to close and reopen the app so it applies at once (otherwise within 15 minutes).

The Super Admin role cannot be given this way — ask IT.

F. A manager or staff member moves to another kitchen

There is no "change kitchen" option in the app today. Remove the account and create a new one at the new kitchen (their old records stay under their old account), or ask IT to change the kitchen on the server.

G. Someone leaves

1. **Super Admin:** User Management → their row → ✕ **Remove** → "Yes, remove" → OK. **Other admins:** People → ✕.
2. They cannot sign in again. Their past cleaning records and photos stay.

H. Weekly review

1. Home → set the picker to **All 8 locations** → look at the league table and Surat vs Ahmedabad. Tap a kitchen for detail.
2. Check ☒ **Approvals** and clear anything waiting.
3. **Reports** → 🖨️ **Print / PDF** to keep a copy, or ⬇️ **Export CSV** to open in Excel.

I. An audit or inspection visit

Create an account with role **Auditor** for the inspector. They can see every kitchen, every job with its photo, and all reports, but cannot change anything. Remove the account when the audit is over.

6. The cleaning schedule

Every kitchen gets the same full deep-clean checklist. All kitchens are electric only — no gas appliances. You can view the whole list at [Profile → !\[\]\(f4f9ac412efd7fead6377a2b0ae12137_img.jpg\) Cleaning checklist](#) (head office).

Type	Jobs	When
Weekly	33	Every week, spread across Tuesday to Sunday (each job has its own due day).
Every Tuesday	1 of the 33	Housekeeping area cleaning — always due on Tuesday. Shown in its own "Every Tuesday" section on the Cleaning tab and Home, with a yellow EVERY TUESDAY tag.
Monthly (heavy)	13	Once a month, due on different dates between the 6th and the 28th.

Areas: Floors · Walls & ceiling · Tables & surfaces · Fridges & freezers · Machines · Storage · Waste · Electrical safety · Staff area · Housekeeping.

New jobs appear automatically when the app is opened in a new week or month — nobody has to create them. Each job is assigned to the kitchen's Location Manager, but anyone at that kitchen can do it.

Cleaning tab tools: date range (This week, Last week, Last 7 days, or From / To), filter chips (All, Weekly, Monthly, Tuesday, Pending, To approve, Rejected, No photo, Done), and for staff "My jobs".

7. Appendix — permission table

✓ = can do · — = cannot · **own** = own kitchen only. SA = Super Admin, EH = Execution Head, AEH = Assistant Execution Head, HoK = Head of Kitchen, LM = Location Manager.

Glossary

Word	Meaning
PENDING	A job not done yet.
OVERDUE	A pending job past its due date.
AWAITING OK	Done with a photo, waiting for a manager or head office to approve.
APPROVED	Checked and accepted — counts towards the kitchen score.
REJECTED	Sent back with a reason — needs doing again.
NO PHOTO	Marked done without a photo — should not happen; the photo is compulsory.
Re-open	Puts a done job back to pending (approvers only).

Word	Meaning
Temporary password	Set by an admin; must be changed at the next sign-in.
Pending account	A self sign-up waiting for the Super Admin.

This guide describes the app as of 19 September 2026. If roles or screens change, update docs/role-guide.html and print it again to PDF.
